SUMMARY

Highly motivated and detail-oriented Frontend Developer with a solid foundation in React.js, JavaScript, HTML5, and CSS3. Recent Bachelor of Computer Applications (BCA) graduate with hands-on experience in building responsive and dynamic web applications. Proficient in creating clean, maintainable code and implementing reusable components using React. Familiar with state management and modern development tools like VS Code, version control (Git), and Chrome DevTools. Eager to contribute to real-world projects, learn from experienced teams, and grow as a professional Frontend Developer in a collaborative environment.

PROJECTS

1. Cab booking project 🔗
Shree Shakti Cab

Tech Stack: HTML, CSS, JavaScript, jQuery

Developed a responsive and user-friendly cab booking platform. Features :

- A dynamic booking form with date & time pickers, contact validation, and location inputs
- Real-time form validation using JavaScript and jQuery
- Clean UI with modern design, responsive for all devices
- Contact form with data validation to ensure only valid 10-digit contact numbers
- Organized codebase for easy maintenance and future enhancements

This project enhanced my skills in frontend development, responsive design, form handling, and real-time user interaction.

2. E-commerce Project 🔗
Mini mart

Tech Stack: React.js, JavaScript, HTML, CSS, DummyJSON API

Built a modern, responsive **E-commerce web application** using **React.js** and **DummyJSON API** for real-time product data. Key features :

- Product listing page with dynamic data fetching and card-based UI
- Search and filter functionality to find products easily
- Add to cart and cart management using React state
- Clean routing with React Router for product details, cart, about, and contact pages
- Responsive design for all screen sizes using plain CSS
- LocalStorage integration to persist cart and contact form messages
- Built with clean, reusable components following React best practices

This project improved my skills in API integration, component-based design, state management, and building real-world React apps.

TECHNICAL SKILLS

Programming Languages : — HTML5, CSS3, JavaScript

Frameworks and libraries : — React.js, jQuery, Bootstrap, Tailwind CSS

Soft skills : — Problem-solving, Adaptability, Eagerness to learn, Teamwork, Communication
